Integrated Approach in Treating Child Conduct Disorders

One-day Workshop

4 November 2016

Course Description

The one-day workshop will provide practitioners with refreshing perspectives on family intervention. Strategies used to maximise parental engagement, reduce drop-out, and facilitate positive change in difficult families will be introduced.

Course Content

- Introduction to family treatment of child conduct problems
- Key models of therapeutic change
- Translating models into a practical family intervention: case examples
- Setting up practical change processes I: Engaging the parents
- Setting up practical change processes II: Developing a shared plan for change
- Setting up practical change processes III: Dealing with resistance
- Implementing the programme
- Problem solving & case examples

Medium of Teaching

Both lecture and handout are in English.

Accreditation

CME/CNE/CPD/CE accreditation in application.

Certificate of attendance will be issued with full attendance.

About Prof. Mark R Dadds

Mark Dadds is a Principal Research Fellow of the National Health and Medical Research Council of Australia and Professor of Psychology at the University of Sydney. He is also the Co-Director of the Sydney Child Behaviour Research Clinic which develops state-of-the-art treatments for children and adolescents with behavioural and emotional problems, and he has developed and directed several national intervention programmes for children, youth, and their families, at risk for mental health problems.

He has been the National President of the Australian Association for Cognitive and Behavioural Therapy, Director of Research for the Abused Child Trust of Queensland and Professor of Parenting Research at the Institute of Psychiatry, Kings College London. He has received several awards including an Early Career Award from the Division of Scientific Affairs of the Australian Psychological Society, the Ian Matthew Campbell Award for Excellence in Clinical Psychology, and a Violence Prevention Award from the Institute of Criminology.

Prof. Dadds has authored four books and over 230 papers on child and family psychology, and has given invited keynote addresses to international audiences throughout the world. His parent training treatment for parents of children with conduct problems was recently featured in the three-part series “Kids on Speed?” for ABC TV. He also practices as a clinical child psychologist.
