

Dr Jack STARMER

MD, MMHC

Jack Starmer, MD, MMHC, is an Assistant Professor in the Department of Biomedical Informatics, and Chief Quality Informatics Officer at Vanderbilt University Medical Center in Nashville, Tennessee. Dr. Starmer oversees the creation of clinical content and integration of content throughout the Vanderbilt enterprise in support of high quality and cost effective patient care. An internist and former clinical fellow in Biomedical Informatics at Vanderbilt, Dr. Starmer has considerable expertise in nursing and physician informatics for system design, computer-human interface, and integrating software tools into clinical workflow. Current research interests include clinical software adoption, outcomes focused performance and quality improvement, and integrating evidence-based decision support at the point-of-care.
