The Academic Perspective on Creating a Positive Practice Environment

Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN

Presented at the
Hong Kong Hospital Authority Convention
16 May 2013

Mount Sinai

Overview

- Delineate the service delivery academic partnership components.

- Describe specific outcomes of the Center for Nursing Research and Education.

- Identify the core components of a Professional Practice Model implemented, and the links to theory and research.

- Describe ongoing projects (practice and research).

Mount Sinai

Service Academic Partnership Components

- Structure: Center for Nursing Education and Research

- Process: Identify nurse leaders for participation in core projects

- Outcomes: Research (intramural and extramural), presentations, and publications.

Mount Sinai

Center for Nursing Research and Education
The Mount Sinai School of Medicine

Center for Nursing Research and Education Outcomes

Geropsychiatric alternative intervention to reduce agitation (doll study)

Center for Nursing Research and Education Outcomes

Complementary interventions for pediatric inflammatory bowel disease

Claire Ceballos

Mount Sinai

Center for Nursing Research and Education Outcomes

Development of the Nursing Leadership Academy

The Mount Sinai Medical Center Professional Practice Model

- How we developed the Model: Links to Relationship Based Care and the national Standards of Professional Practice

- How we implemented the Model

- Sustainability initiatives

- Evaluation and research

What is the PPM at Mount Sinai?

Extension of Relationship Based Care Model and Relationship Centered Care Model:

Care of patients/families

Care of self

Care of clinical colleagues

Care of community

Care of all team members

Evaluating Results of the PPM Implementation

- The Caring study: Linkages between caring behaviors and patient satisfaction

- Cross-national Caring Study: Comparing US and Irish nurses caring behaviors

Mount Sinai

Current Scholarship Projects

Expansion of therapeutic intervention study with geriatric patients throughout the hospital

Current Scholarship Projects

Falls assessment among psychiatric patients, and geropsychiatric patients

Mount Sinai

Current Scholarship Projects

Doctoral student/nurse leader initiatives focused on integration of theoretical perspectives in professional practice, evaluation of practice interventions to increase patient satisfaction, and characteristics of nurse leaders (e.g. empowerment among nurse managers)

Link to the IOM Initiative on the Future of Nursing

Recommendations for an action-oriented blueprint for the future of nursing

IOM Report on the Future of Nursing

- Nurses should practice to the full extent of their education and training.

- Nurses should achieve higher levels of education and training through an improved education system that promotes seamless academic progression.

- Nurses should be full partners, with physicians and other health care professionals, in redesigning health care in the United States.

- Effective workforce planning and policy making require better data collection and information infrastructure.
