P1.1

Professional Service – Patient Safety

10:45 Convention Hall & Theatre 1

## Innovation in Patient Safety

*Darzi A*

*Imperial College London, UK*

---

Interacting with healthcare services is one of the most dangerous activities that patients and the public regularly participate in. Patient safety is a concept all too often neglected when considering healthcare innovation and reform, yet it remains a significant opportunity to save lives and improve the cost-effectiveness of healthcare. Some of the emerging new trends in cutting-edge technologies, practices and services that are transforming healthcare delivery and promoting a new safety-focused healthcare culture will be outlined.
