

# Use of Casemix Information to assess Potentially Preventable Chronic Disease Hospitalizations in Hong Kong

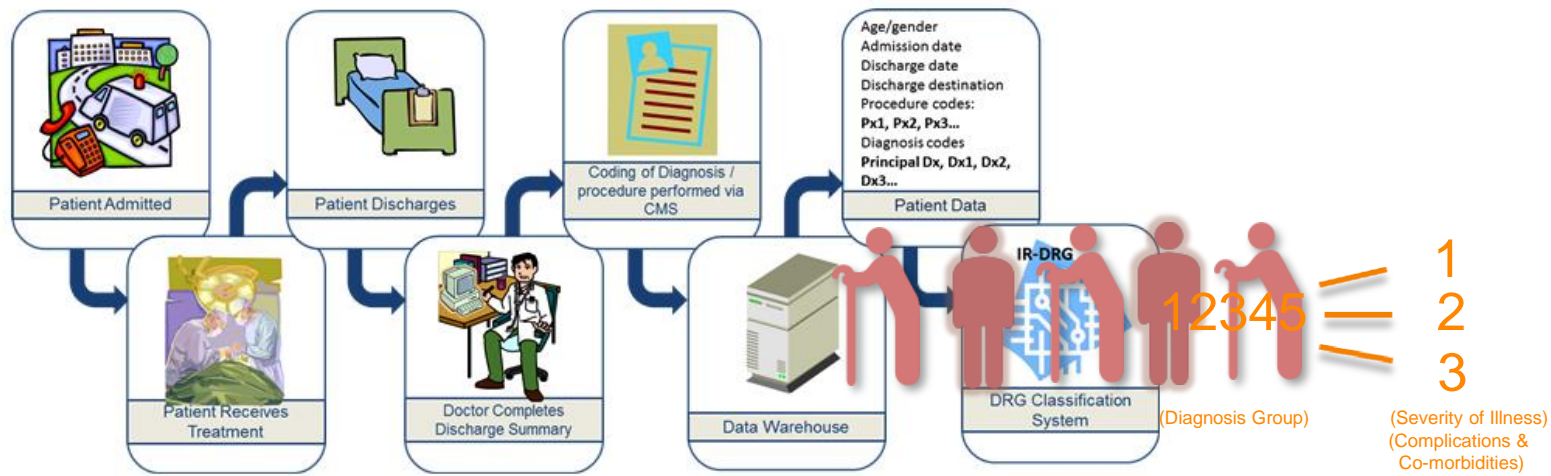

Ms Kian WONG  
Statistician  
HO Finance (Casemix Office)

How can  
Casemix help??  
Any pattern??

**Exclusion:**

1. Under 15
2. With
  1. Asthma, or
  2. Congestive Heart Failure, or
  3. COPD, or
  4. Hypertension

**Diabetes acute inpatients**

- Diagnosis
- Casemix – Severity of Illness (SOI)
- Casemix Costing
- Demographic

DM acute inpatients

60%

40%

In-patients

**Saving 2,650 bed days**

Controlled DM patients

Appropriate hospital  
well as financial  
utilization

for benchmarking and  
monitoring

Thank
