**Introduction**  
Launched from July 2013, the departmental “Nursing Quality and Risk Management Committee” is organized and shared the “CQI /Kaizen Projects, KPI, AIRS and Near Miss Events” quarterly. It focuses on sharing the good projects, and the learning points from the AIRS and Near Miss Events. Additionally, the workgroup would be sharing the risk alerts from “HA Risk Alert/ NTWC Safe Clinical Practice Bulletins” for enhance alertness.

**Objectives**  
(1) To promote the good practice /projects among the department  
(2) To engineer a “Safety Culture with NO blame culture”  
(3) To monitor, share the good /learning points and raise alertness from the “KPI, AIRS and Near Miss Events”

**Methodology**  
(1) Organize the workgroup: - A workgroup is organized and the representatives are registered nurses and advanced practice nurses which coming from different area (includes Day Chemo. Combine Centre, Day Hospice Centre, Oncology ward, Outpatient Clinic, Palliative and Hospice ward) within the department, WMs and DOM as Advisors.  
(2) Report “CQI /Kaizen Projects, KPI, AIRS and Near Miss Events” quarterly in meeting by individual area: - To share the good practice by “CQI /Kaizen Projects”. - To share the “KPI, AIRS and Near Miss Events”. - To proceed the root causes analysis /share the learning points from “KPI, AIRS and Near Miss Events”.  
(3) Issue “Bulletin” as meeting minutes: - To prepare and issue the bulletin quarterly as meeting minutes. - To print out as “A3 size” like a poster to draw the attention from the staff, and distribute to individual area for reference. - Upload to departmental website as electronic journal for quick reference.
**Result**

(1) 7 numbers of “Bulletins” has issued and distributed to all area among department till 4Q 2014. (2) Some area has changed their KPI after discussion in the meeting. (3) The CQI /Kaizen projects have shared among the hospice ward and oncology ward for the quality improvement. (4) Majority of nurses' agreed that they have enhanced the alertness and risk management after implemented the project. Conclusions: Majority of nurses' agreed that the “Good practice” and “Learning points from the KPI /AIRS and Near Miss Events” are useful and enhanced alertness. “Do less is more in Risk Management” shows successful in Department of Clinical Oncology.
