Digital Tools to Enhance Clinical Care: Today's Offerings and Tomorrow's Possibilities

*Ho K**Faculty of Medicine, University of British Columbia, Canada*

This presentation will highlight the rapid development of digital tools in health, and how physicians and health systems can take advantage of these tools to enhance patient care and outcome, and health system effectiveness and cost effectiveness. Participants will:

- (1) Understand the general public's interests and desires of digital health tools.
- (2) Identify ways that health professionals can use these tools for improved patient care.
- (3) Conceptualise how policy makers and senior health administrators can leverage these tools for health system effectiveness in care and cost effectiveness.
- (4) Explore ways to take action in introducing technologies into health system implementation.
