DEPARTMENT OF PSYCHIATRY SUBSTANCE ABUSE CLINIC

Introduction

The Substance Abuse Clinic of Department of Psychiatry, Queen Mary Hospital has been re-established in 2008 to provide psychiatric care for people with substance abuse problems from the Hong Kong West Cluster (including part of the Southern District) and outlying islands (except Tung Chung New Town).

The Clinic aims at delivering holistic care with assessment and treatment for people with substance-related psychiatric and physical problems. Collaborating with other professionals including occupational therapist and social workers, we work with the substance abusers to attain abstinence, to rehabilitate them to sustain a substance-independent living, and to reintegrate them into the community.

Target Population

The Clinic provides care to people with

substance abuse problems or substance-related psychiatric disorders.

Scope of Services

- ◆ Performing assessments on the psychiatric and physical conditions related to substance abuse problems.
- ◆ Developing management plan to assist detoxification, to attain and sustain abstinence, and to treat substance-related psychiatric disorders and / or physical problems
- ◆ Collaborating with professionals from the non-governmental organizations to support substance abusers and to facilitate relapse prevention in the community
- ◆ Providing support to families and/or carers of substance abusers to enhance their understandings of the problems and to empower them to take up the supportive role throughout the treatment and rehabilitation process

- ◆ Providing education to the general public on prevention about substance misuse/abuse and conducting educational seminars for frontline workers from non-governmental organizations
