

## 新大樓主要服務

### Major Services in New Block

新大樓主要臨床設施及服務包括急症室、急症科病房、放射診斷科、手術室、心導管化驗室、深切治療部／兒童深切治療部及住院病房等，樓層分佈採用以病人為本的設計，協調各類服務確保急症室與緊急樓層（如手術室及深切治療部等）連接暢通，有利緊急服務，為危殆病人提供更快捷及適切的治療。新大樓天台將設置直升機停機坪，提升緊急醫療運送服務。

瑪麗醫院重建計劃分階段進行，我們會在規劃重建項目第二期時，因應實際情況及運作需要，仔細研究搬遷位於T座的惜別間(殮房)至靠近主要的臨床設施，以配合醫院的長遠服務規劃及發展。

The New Block will mainly accommodate Accident and Emergency (A&E) Department, Emergency Medicine Wards, Diagnostic Radiology Department, Operating Theatres, Cardiac Catheterization Laboratories, Intensive Care Unit/ Paediatric Intensive Care Unit and In-patient Wards. The stacking of New Block will adopt a patient-oriented design with well-coordinated services and convenient connection between the A&E Department and hot floors such as operating theatres and Intensive Care Unit so as to strengthen emergency services for critical patients. A rooftop helipad will be provided in the New Block to enhance the transportation arrangement for life saving service.

The QMH Redevelopment Project will be conducted in phases. Relocation of the existing Bereavement Suite (mortuary) at Block T nearer to the major clinical facilities is targeted to be carefully explored in the planning of phase 2 of the redevelopment project according to the actual situation and operational needs in order to tie in with the long-term development of the hospital.

## 突發事故應變計劃 Formulation of Contingency Plan

鑑於二戰時期瑪麗醫院附近曾被空投炸彈，院方早前聯同建築署、其承建商及香港警務處爆炸品處理課進行實地視察及評估，並聯同相關部門制定突發事故應變計劃。有關細節已於八月中透過新聞發佈會對外公佈，院方亦為社區人士及公眾製作應變懶人包，介紹具體措施及安排，包括暫停急症室和專科門診服務、疏散病人至安全位置等，務求保障病人、員工及公眾安全，同時與各界保持適時溝通。

而承建商在相關位置進行了金屬探測及試探挖掘，並無發現炸彈。感激各社區伙伴、部門及單位全力配合支援，協助院方做好準備，應對突發情況。

承建商利用金屬探測器偵測金屬異物  
The contractor uses a metal detector to identify any foreign object

In light of the fact that the area near Queen Mary Hospital (QMH) was a target of air raids during World War II, QMH together with the Architectural Services Department, the contractor and the Explosive Ordnance Disposal Bureau of Hong Kong Police Force conducted site inspection and risk assessment of the concerned construction site. Contingency plans were formulated in collaboration with relevant departments and details were announced to the general public via a press conference held in mid-August. The hospital also prepared an "easy guide" for the community to learn about the contingency measures and arrangements, including suspension of the accident and emergency as well as specialist out-patient clinic services with an evacuation plan put in place to ensure safety of patients, staff and the public. Timely communication with various parties was also assured.

The contractor carried out metal detection and trial pit excavation at the concerned locations. No foreign object was found. We would like to express our sincere gratitude to all community partners, departments and units involved for their support in preparing the hospital for contingency circumstances.
