

尊敬的那打素醫院2樓D2病房的領導:

您們好!本人在2021年1月18日因工傷手腕骨折和韌帶撕裂,1月27日動了手術在康復過程中,我努力地做物理治療和職業治療,但不知道什麼原因令到手腕硬、傷口痛、手麻痹、手掌和手指肌肉萎縮,給我帶來很大的精神困擾。擔心這種痛和不舒服會陪伴我一生,又怕以後不能工作。

至到2022年8月11日感恩是吳醫生睇症,他友善和細心講解我的病情和以後怎樣醫治,9月23日他又親自幫我做神經傳電檢查,我感覺遇到救星。

23年2月13日入貴院做手術,住23號病床,手術前吳 醫生仔細講解手術過程,通過這次手術後,我的手有改善。

在此我衷心感謝吳醫生專業、友善、有同理心、醫德高尚。

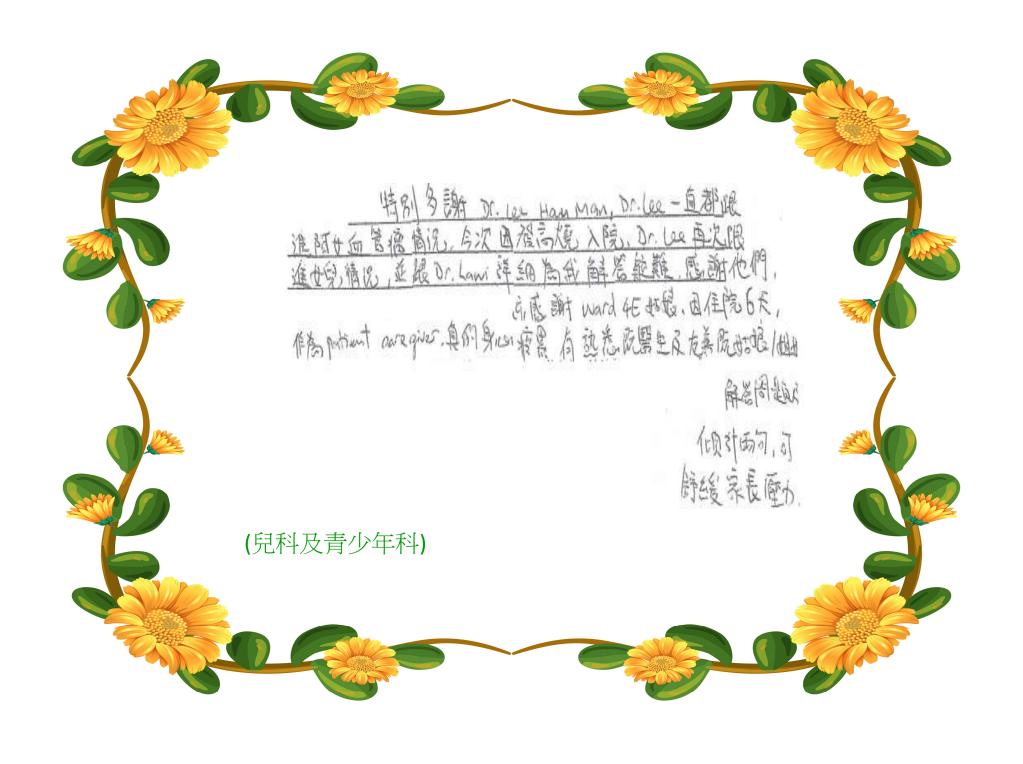

讓我再次感謝吳醫生和他的團隊,還有醫務助理張少 燕姐姐十分照顧我,幫我穿衣、斟水,友善樂於助人。

祝願吳醫生和那打素醫院的全體醫護人員身體健康, 工作順利,萬事如意,家人幸福安康。

(矯型及創傷(骨)外科)

Dear sirs,

Patient:

My father (patient as shown above) has been receiving the 8 week home nursing services provided by your Hospital.

While this service is approaching an end and I am about to leave Hong Kong, I am relieved that his well being is left to the safe hands of the medical and health staff of your Hospital.

This 8 week home service is effective and highly beneficial to my father, both in medical and mental perspectives. Thanks to everyone who makes the decision to provide this service to him.

I would like to particularly thank Ms Cheung, the home visit nurse, who is a very good communicator, who could bridge the communication gap between the health and care services. Before, my father didn't understand his health condition. Now he understands more from Ms Cheung about his medical condition and how to deal with high blood pressure both mentally and physically. He now knows that a high dose of medication might do him more harm than good.

Ms Cheung is a good convincer too. I spent the last two decades persuading my father to reduce intake of salt without success. With effective persuasion skills, my father listens to her. The fluid inside his feet is reduced after a month of reduction of salt intake. This could reinforce my father's belief in her words.

My father has a more relaxed mind now. He understands he has to live with high blood pressure and meanwhile do more exercise to strengthen his muscles to make his self dependent living sustainable.

When I first saw him two months ago, he said this was probably the last time he saw me. I am leaving tomorrow now, he said, I am sure I will still be here in 2-3 years' time. What encouraging words.

Thank you again to everyone who has made an effort to organise this 8 week service to him.

Best regards,

(Son of the patient)
