

Dr Lau , CP Team

Alice Ho Miu Ling Nethersole Hospital

(Clinical Psychology)

27th Aug, 2013

Dr Lau, his CP team,

I am writing to show my appreciation to Dr Lau and his team for organising social skills training groups for children with autistic features and parallel groups for parents.

I am impressed by the enthusiasm and persistence. Dr Lau as organized it for years and he sincerely invites my son and me to join.

The group content is inspiring, practical and interesting. In parent group, it teaches me pragmatic ways to handle difficult situation. In the children group, my son begins with avoiding joining the group and progresses with prioritizing it and joining it with fun and enthusiasm. He puts aside certain interesting activities and tells me that "I prefer this to Ocean Park programme because this group is useful". He told me he got more practical tips in handling bullying and in managing his emotions.

The team, led by Dr Lau and Ms. Lai, devotes a lot of efforts to make it interesting and pragmatic. It also prepares a lot of audio visual aids to consolidate the training. It impresses us to be quality service. Group work really goes in line with individual counseling to yield the greatest improvement for children.

I am amazed too by Dr Lau's commitment and wisdom in serving this target group and his team accumulated knowledge and experience in it. This is the best group I and my son have joined.

Certainly, the department of Clinical Psychology of New Territories East Cluster and Alice Ho Miu Ling Nethersole Hospital is supportive enough to facilitate such resource allocation.

Yours Sincerely ,

Mother of
