To whom it may concern,

I am writing to express my gratitude and appreciation on the community nursing service provided by your centre.

A few months earlier I had a surgery and was unable to move easily, so I decided to have community nursing service for regular wound care treatment. Community Nurse Ms. Kwok was the one who followed my case and visited me the most often, and there were other nurses too. Not only did Ms. Kwok perform the duties in a professional manner, but also taking care of my emotions which meant quite a lot to me during the hard times.

I would like to thank you for the care and encouragement given by them all. It is really appreciated and I trust many patients like me do benefit from the service from time to time. Thank you again.

Yours sincerely,
