HOSPITAL AUTHORITY CONVENTION 2013

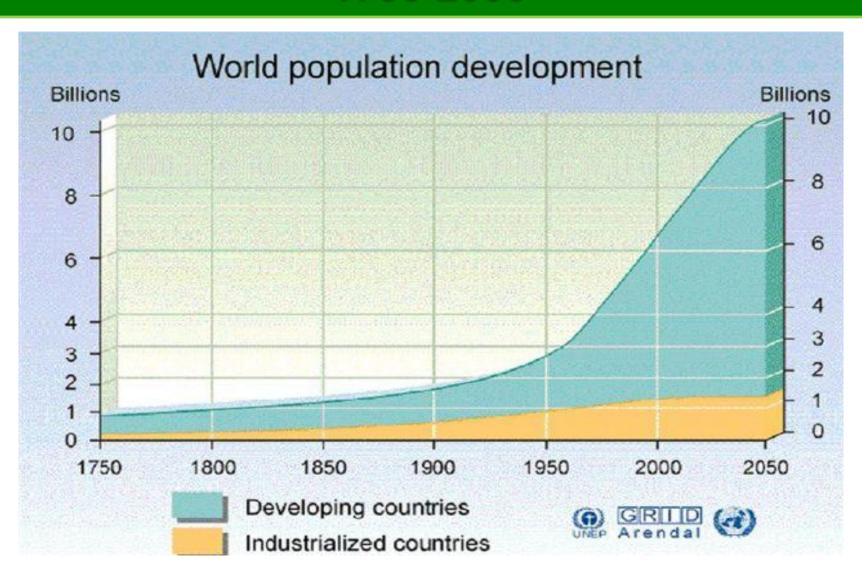

Symposium 5: Impact of an Ageing

Population: Way Forward for Health and

Social Care

Professor CHAN Cheung Ming Alfred Chairman, Elderly Commission, HKSAR Director, Asia-Pacific Institute of Ageing Studies, Lingnan University

World Population Development 1750-2050

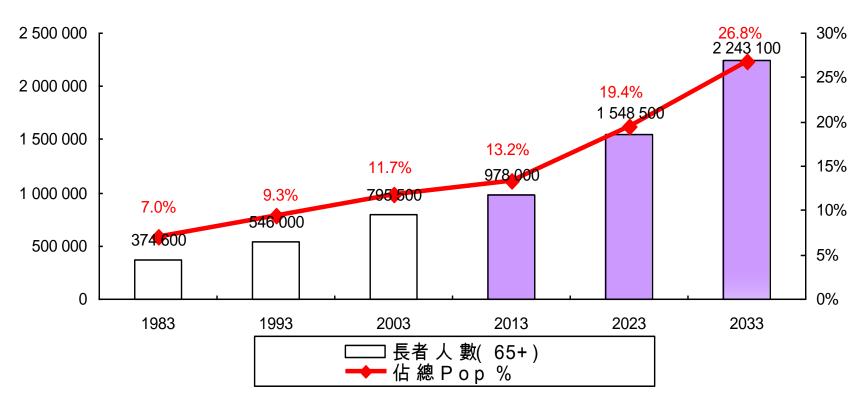

Percentage of 60+: Asian Trends

國家/地區	2000 (%)	2025 (%)	2050 (%)
日本 Japan	23.3	36	44.2
韓國 Korea	11.2	27.1	40.8
新加坡 Singapore	10.6	31.7	39.6
泰國 Thailand	9.6	19.1	26.4
印尼 Indonesia	7.7	13.7	24.8
中國內地	10	19.6	31.1
Mainland China			
香港 HK	14.8	30.8	39.5
澳門 Macao	9.7	27	43.6

資料來源: United Nation Economic and Social Commission for Asia and the Pacific (2002)

Ageing trends: number & rates

每年增長 +5%/year (65+)

Fertility & Longevity in Asia Pacific

Total Fertility Rate in the Asia-Pacific region		
Macao	1.02	
Hong Kong	0.99	
Singapore	1.25	
China	1.64	
World Average	2.52	

Life Expectancy in the Asia- Pacific region			
Macao	80.03		
Hong Kong	81.61		
Singapore	80.60		
China	72.71		
World Average	67.88

Ageing Challenges in Asia for the Future

Getting old while getting rich

Large older population increasing rapidly

Longest living → **dementia etc.**

Women outlive men for 4-5 years in Asia

Shrinking of the younger population : some 10 - 20% -> need to involve all ages, old & young

Broken traditional values & technology divide: highly individualized life style, loose family care, high divorce rates, dependent on public care

Sustainability issues: funding, partnerships & training considerations

Key Challenges of an Ageing Population: Providing LTC

FORMAL/ INSTITUTIONAL CARE

Health and Social Services: home support, hospital & nursing homes

Q: What? who? Where? When? And how much?

Curative Interventions

Health Promotion & Disease Prevention

INFORMAL SUPPORT

Care from Family Members & Friends:

Carer training & supports

Q: to what levels? How much? Recognition?

SELF -CARE:

financial support

Self-care ability

Q: As much as possible but how to do it?

What we have:

Health & social services in Hong Kong

Health care: Health promotion, OPDs, SOPDs, Hospitals (CGATs)

(almost free at the point of entry)

Financial supports:

OAA, OALA, CSSA

Community services:

- Multi-service centres for the elderly
- Support team for the elderly
- Social centres for the elderly
- Day care centre for the elderly
- Home help service
- Home care service (integrated home care, HC & enhanced home care)
- Home Visit Nursing Service
- Home Visit Rehabilitation Service
- Home Visit Medical advice

Institutional care

- Self-care hostel (upgrading/conversion)
- Home for the aged (upgrading/conversion)
- Care and attention home (more places in private homes)
- Nursing home
- Infirmary
- · Geriatric/rehab. Beds in Hospitals

23,300 places

75,000 places

Problems of present health & social services

- Health services: waiting time, (drugs formulary), NCDs
- Service-driven, not user-focused: time, places & types
- Boundaries-conscious: services segregation
- Second order effect: service-substitutions
- Almost free at point of entry, no room for private market
- Easily accessible with reasonable quality
- Heavily loaded on public/NGO sides
- No product differentiations: little choice for mid-income earners
- Shortage of staff: all levels
- Fair share of responsibilities/costs? Public Vs Private
- > long term sustainability?

Policy resolutions proposed

- 'Think-out-of-the box' policy-making→ pilots in health & social services
- Public awareness & mind set change: preparation for the coming of the age, with a positive mind
- Intergenerational solidarity building (as opposed to intergenerational conflicts)
- Training of young workers for LTC care: QF
- Ageing in place with adequate supports (supply ondemand, 24-hours round the clock)
- Best value for quality service: Affordability, Accessibility,
 Availability (choices) and Appropriateness

Setting over-riding principles

Family as Core, institutional care as Supplement

- strengthen family care till last moments
- keep institutional care as short as possible (say the last 12-18 months)

Neighbours as support

- neighbourhood mutual supports (e.g. reporting abuses)
- attendance care (i.e. watch out for friends, elder sitters)
- routine visits & mutual support (e.g. health ambassadors)

Rolling out programmes at a glance

Make opportunities for interactions between all ages, e.g. wallless schools, elder academies

Love thy neighbours: good neighbours programmes

Self care & self responsibilities: health promotion, NCD management, life long learning & volunteering

Capacity building for care givers esp. women in strengthening the new families, carers supports/training with QF

Digital Unity instead of Digital Divide

Community Schools, Community Education, community cares

Cross-professions, -sectors, -departments platforms; agefriendly environments

Nurturing a giving culture within the Community-family context

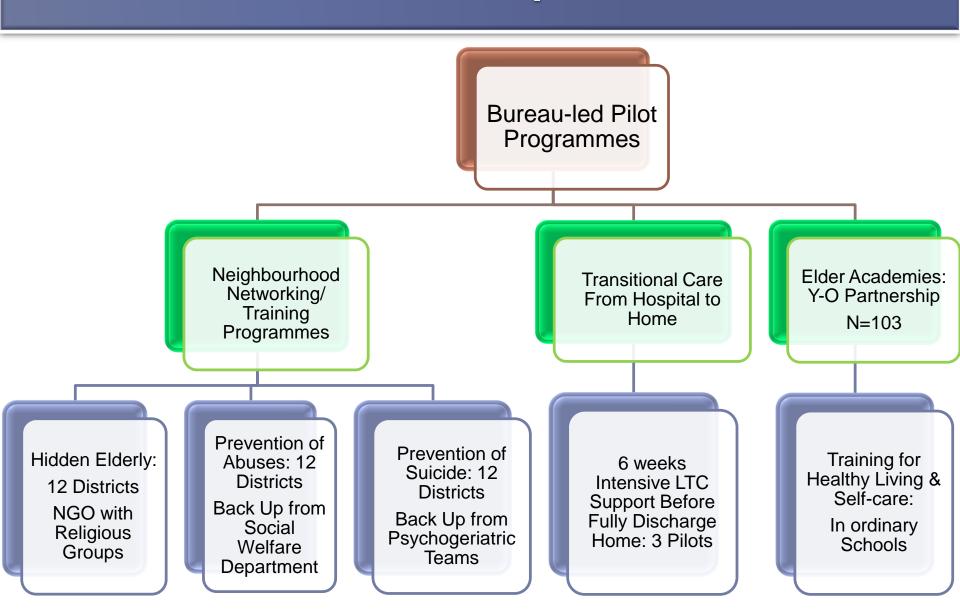

Service-Learning in schools: establishing a giving culture

Set New Norms for Family & Community

Caring for the aged through promoting intergenerational supports

Nurturing a caring community

EC initiated pilots:

Training and recognizing aged care workers

The Qualification Framework Pilot

Training people for LTC: care levels to match needs

Medical Case Management

Level 3

Highly Complex Patients:

10% Being cared for by medical & health professionals

More health & less social

Specialist Disease Management:

<u>Target specific</u> - elders with high risks e.g. living alone, diets

<u>Diseases specific</u>: Diabetes, high BP & MCI

Level 2

High Risk elder Patients:

10% Being cared, monitored & changed

(life styles & behaviours)

Social Care: Supporting Care and Self Care

step-down care training for carers & elders

Level 1

,70-80% of a Chronic Disease Population

Qualification Framework (QF) with a career

HK QF Graded levels

- 1. 初級 (Level 1) = Amah & care workers
 - 2. 中級 (Level 2-3)= PCWs & Hwkers
 - 3. 高級 (Level 3+)=multi-skilled wkers
 - + academic qualifications

接駁大學/專業訓練

(formal tertiary or professional training)

Pilot: 100 school leaves/drop-outs

to be recruited to work as PCWs

to be trained for higher qualifications while working x1 yr

Joint pilot: NGO (Yuen Yuen), OUHK, EdB (QF), LWB(VTC), Private Homes, EC

Building capacities and enhancing choices

Money-follow-the elderly:

- Customer decide
- Huge sum released into the market
 - (1.2b/yr)
 - Stimulate constructive market competition→ more choices

Elderly Health Care Voucher Pilot Scheme

- Launched since 2009, and extended up to 2014
- Starting from Jan 2012, annual voucher amount increased from \$250 to \$500 for each eligible elderly aged 70 or above

 Increased to \$1,000/yr, allowing accumulation to \$3,000 or for 3 years

Elderly Vaccination Subsidy Scheme

- Launched since October 2009
- Subsidies provided to elderly aged 65 or above to receive seasonal influenza vaccination and pneumococcal vaccination from private medical practitioners
- Subsidies level (for 2011/12)
 - seasonal influenza vaccination: \$130 per dose
 - pneumococcal vaccination: \$190 per dose

Money-follow-elderly initiatives: housing (internal facilities improvements)

- \$5,000/household
- Any items to improve living e.g. rice cookers or grip bars
- Older person→
 Centre (SE) → SWD
- Enable QoL and encourage social enterprises

Money-follow-elderly initiatives: social care

- Community care services vouchers Pilot in October 2013,
 1,000 places on waiting list for moderate frailty persons
- \$5,000 voucher value, for day and home care
- Guided with a care management initiative
- Allows co-payments
- New means test scheme:
 if accept co-payment of \$2500, no means test.

Pilot: 8+2 districts

with an initial start-up grant

綜接長者自願回廣東省由或福建省養老計劃 The portable CSSA Scheme

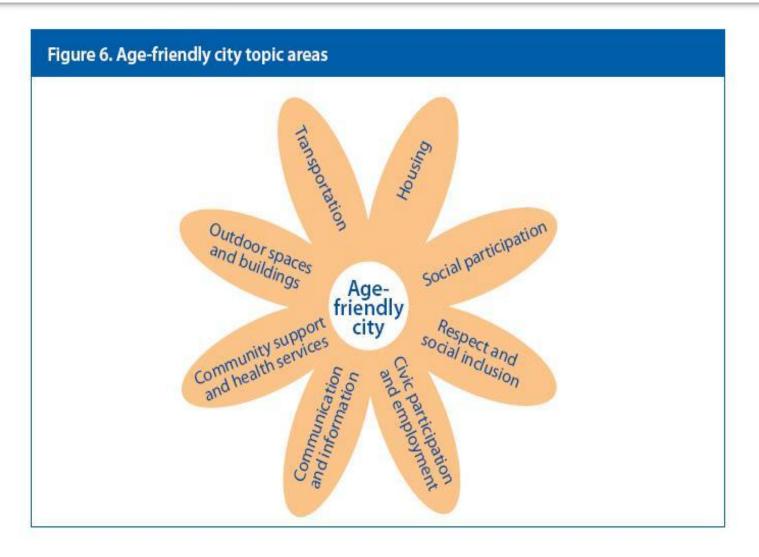

Possibilities of extending the bought-places schemes in and near Quandong Provinces? E.g. Yim Tin (Rehab. Aid) and Zhaoqing (Helping Hands) Homes?

- For those qualified for CSSA
 & want to return to live in Quandong or Fujen
 Provinces in Mainland
- Must be 60+, as a resident for 7 years and continuously in receipt of CSSA for a year
- Cash benefits include standard rate & supplements

Creating a conducive environment

Making a WHO versioned "Age-Friendly City"

Adopting WHO Age-friendly Cities

A Global Age-friendly Cities Guide (http://www.who.int/ageing/publications)

As a last word of advice for those young and able

Don't rely all on your Government – no government in the world can be relied on for your old age protection!!!

Rely on YOURSELF:

Please SAVE as early as possible: money,
Health, & Younger friends
