Post title: Resident, United Christian Hospital,

**A Clinical Audit on Pneumococcal Vaccination in a Family Medicine Specialist
Clinic under Hospital Authority**

Lee Chi Leung

United Christian Hospital Family Medicine Integrated Clinic

Keywords:

Audit

Pneumococcal vaccine

Introduction

Clinical Audit on pneumococcal vaccination rate in elderly

Objectives

To achieve improvement in the coverage rate of pneumococcal vaccination in our clinic

Methodology

Patients aged 65 years old or above on attendance were included. After evaluation of the results of the first cycle, deficiencies in patient care and the reasons were identified and discussed in a practice meeting in our clinic. Measures implemented include educational presentation, review meetings, introduction of guidelines, education pamphlet and consultation templates.

Result

The total vaccination rate raised from 59.1% to 77.2% through the audit cycle.
