Environmental Cleaning in Clinical Areas

CHIU CSG(1), WONG LCA(2), LAI WMR(1), Ng KHT(2), PWH Infection Control Team (1)

(1) Infection Control Team, Prince of Wales Hospital (2) Hospital Administration, Prince of Wales Hospital

Keywords:

Environmental Cleaning

Color coding

Introduction

Proper cleaning and decontamination of clinical environmental surfaces contributes to health-care-associated infections prevention.

Objectives

To standardize the cleaning method and frequency.

Methodology

1. Set up a color coding system for cleaning equipments in PWH and set the cleaning frequency in different areas. 2. Set up cleaner performance and monitoring program to assess the cleaner's performance by using UV material.

Result

(1) Environmental Cleaning Guideline in Clinical areas was established in PWH in 2011
(2) A 4 Color coding system and cleaner performance check for Environmental cleaning were established and fully implemented in both in-house and contract out cleaning services team. (2) UV assessment was introduced and launched for monitoring both in-house and contract out cleaners.
