Post title: Advanced Practice Nurse, Grantham Hospital

To enhance the care for the lung disease patient with CAPD

AU WF(1), KO MF(1), SIN LK(1)

(1) Tuberculosis and Chest Medicine, Grantham Hospital

Keywords:

CAPD

ultrabag exchange system

intra-dialysis care

Renal care

Introduction

Patients required CAPD would be transferred from QMH to TBCU for continued care and one of the common modes is ultrabag exchange system. In order to prepare our nurses to face with this challenge, with the help by the Renal Nurse Consultant , a structured training kit including demonstration video and quick reference guide were produced.

Objectives

Equip nurses with the knowledge and skill to perform CAPD with ultrabag system

Methodology

The quick guide book and demonstration video for ultrabag exchange procedure is prepared including the intra-dialysis care, pre and post dialysis care.

Result

Nursing competency in caring patient with ultrabag system is enhanced.
