**Post title:** Advanced Practice Nurse, Grantham Hospital

**To enhance the fresh graduate's care and management of patient with chest tapping in TBCU**

*AU WF(1), KO MF(1), HONG KY(1)*

*(1) Grantham Hospital, Tuberculosis and Chest Unit*

**Keywords:**

Chest Tapping  
pleural effusion

**Introduction**

Chest tapping is a common procedure in TBCU. The nurses play important roles in ensuring the investigation to be completed in safe manner, with patient properly managed and with the correct specimen sent out for investigation. However, for the fresh graduate in a new working environment, it would be a stressful experience if they are prepared well. Any delayed or wrong procedure would also adversely affect the patient outcome.

**Objectives**

- To create an environment to inspire and engage fresh graduates to join TBCU
- To equip nursing staff with knowledge and skill in caring patient with chest tapping

**Methodology**

#NAME?

**Result**

- All trainees got pass in the quiz.
- All trainees and nursing supervisors had positive feedback : better preparation for the fresh graduates to take up new roles after graduation.
