

SUCCESSFULLY DECREASED THE LONG WAITING TIME OF NEW CASES
IN COLORECTAL SURGICAL OUTPATIENT CLINIC
THROUGH COLORECTAL NURSE CLINIC
(NEW INTEGRATION MODEL OF SOP SERVICE)

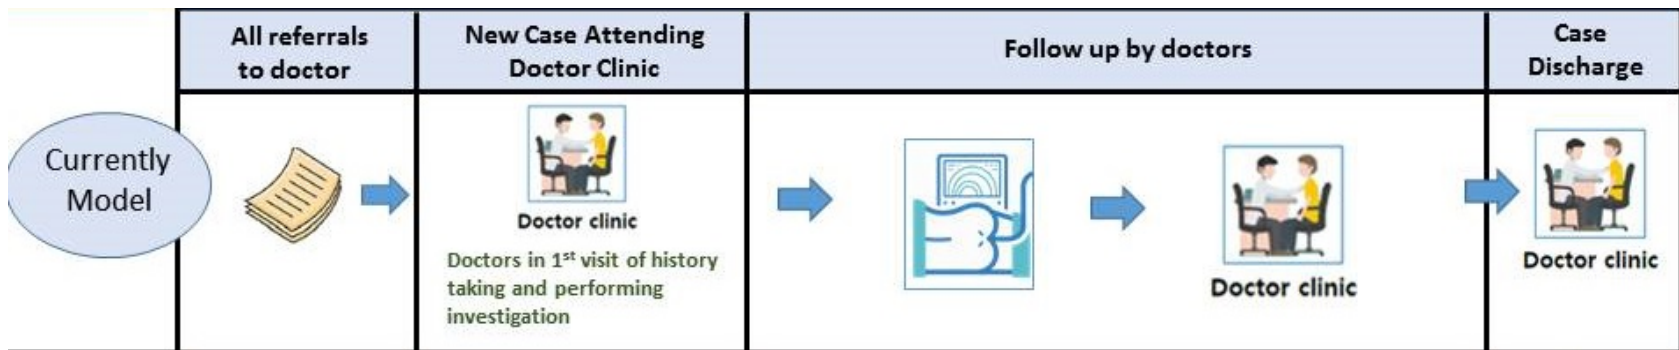

APN Gloria Ng
Department of Surgery
Prince of Wales Hospital

INTRODUCTION

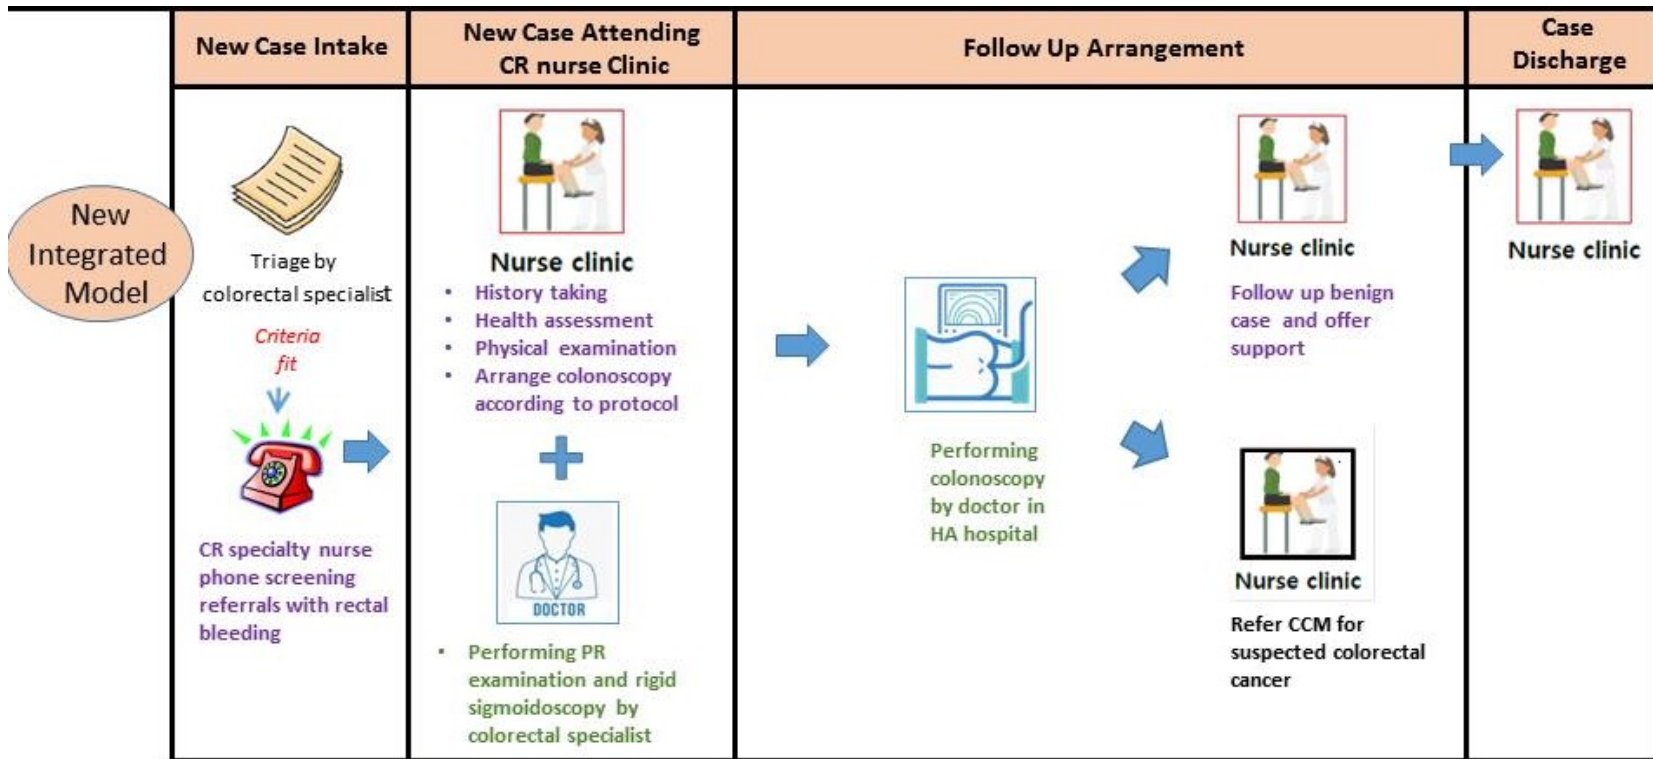

- Colorectal cancer is one of the commonest cancers in Hong Kong. In 2015, there were 5,036 newly registered cases. The new case waiting time of colorectal clinic in PWH is on increasing trend
- In year 2016, around 2359 new cases were seen in colorectal surgical outpatient clinic. At the end of year 2016, the new case waiting time is May, 2021. The long waiting time leading to complications or delay treatment to cancer cases

OBJECTIVES

- To reduce the waiting time to investigate patients with outlet type bleeding, prioritize patient for large bowel investigation and minimize delay in cancer detection
