

KWONG WAH HOSPITAL TWGHs WONG TAI SIN HOSPITAL

ENVIRONMENTAL POLICY

Kwong Wah Hospital & TWGHs Wong Tai Sin Hospital, while delivering quality comprehensive health care services to the public, are fully committed to control, maintain and improve the environment by:

- A. Undertaking the operation, maintenance and procurement in an environmentally responsible manner by implementing various energy saving measures, reducing general consumption of natural resources, minimizing pollution, reducing wastes and encouraging a healthy and sustainable development for the community.
- B. Striving for continual improvement in environmental performance through proper control mechanism or implementation of environmental management system, regular EMS audit including all goals, targets, objectives, and the system will be completely reviewed by top management.
- C. Practising in strict accordance with all relevant environmental ordinances and regulations.
- D. Establishing quantifiable objectives and targets for environmental conformance and action programs to achieve targets in attempting to minimize significant adverse impacts on the environment.
- E. Providing training and green awareness programme to staff as well as end-users to encourage their involvement. The progress of the implementation of EMS and the results will be announced regularly in the form of environmental reporting.
- F. Strengthening our relations with our patients, suppliers and contractors, with whom we shall promote and implement continuous processes and procedures which are of mutual benefits and which also promote better environmental practices.
- G. The public will be welcome to gain access to our environment policy.

Dr Nelson M S WAT
