Link Bridge**

Senior Staff Quarters (SSQ) Conversion Works

- SSQ conversion and associated works are currently in progress.

Overall view of SSQ

New Link Bridge

Fixing of E&M works at L13

Window installation at L16

Slab screeding works at L14

Stage 2

Preparatory Works for Construction of New Block Update

Site Trial of Rock Excavation

- Construction of New Block would involve rock excavation
- To reduce vibration, rock excavation by chemical splitting and hydraulic breaker was proposed
- A site trial will be conducted between end of May and July 2016 to evaluate the effectiveness of the proposed method and estimate the vibration and noise impact arising from the site formation works in future
- Vibration and noise impact during the site trial would be minimal
- A briefing session for user departments of the adjacent blocks was held on 7 April 2016 to explain the details of the site trial

Proposed Location of Site Trial

Chemical agent is injected into the holes during day time

Chemical reactions will induce cracks in the rock mass a few hours later (i.e., during night time)

Vibration monitoring point

Hong Kong West Cluster Community Exhibition

Hong Kong West Cluster Community Exhibition

- A community exhibition will be held on 28 May 2016 at Lei Tung Commercial Centre, Lei Tung Estate
- There will be game booths and display panels to enhance public's understanding of QMH Redevelopment Project
